

18-3-AS Thread adapter set for series 18

DESCRIPTION

The thread adapter set of the 18-AS series is used in conjunction with the pulling devices of the 18 series for the pulling and extracting of components with threads, such as dowel pins, keys, or bolts, in craft, industry, and workshop. The separating puller process is capable of first gently separating these parts before they can be externally extracted.

RANGE OF APPLICATION

Together with the pullers of series 18 for pulling off and extracting components with threads, e.g. dowel pins, feather keys or bolts

BENEFIT

- The thread adapter enables the careful and safe pulling of parts with threaded holes
- Universal compilation for optimal practice application
- Depending on the set, the thread adapters are available in various standard sizes, allowing for an approach suitable for the task.

MASTER DATA

GTIN [EAN]	4021176337208
Country of origin	DE
Case material	Tool steel
Series	18-AS
Net weight [kg]	2,32 kg
Package contents	1 set
Packaging Act	PP 05
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)

SUITABLE FOR

- 18-3_Puller

SPARE PARTS

- GE14-1815_Thread insert
- GE16-1815_Thread insert
- GE18-1815_Thread insert
- GE20-1815_Thread insert
- GE22-1815_Thread insert
- GE24-1815_Thread insert
- VM1815-1815_Connecting nut
