

# 102-1 Piston pin presser for pistons up to Ø 100 mm

## DESCRIPTION

The piston bolt presses of series 102 are used for gentle pressing in and out of the piston bolts in the automotive industry. The tool enables safe mounting and dismounting of the piston bolts using pressure pieces without damaging the piston. Article 102-0 includes two additional pressure pieces, 102-1 is designed for large piston ring diameters and includes three additional pressure pieces.

## RANGE OF APPLICATION

For gentle pressing in and out of the piston pins

## BENEFIT

- Damage-free work on the piston
- Customisable versatile application

## OPERATION

- Remove possible retaining rings before use
- Unscrew the tensioning key on one side and adjust to the piston
- Screw the tensioning key back on and insert the appropriate pressure piece
- Insert the piston and push out the bolt by actuating the drive

## MASTER DATA

GTIN [EAN]	4021176022791
Country of origin	DE
Case material	Tool steel
Series	102
Net weight [kg]	1,335 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
