

126-00 Piston reset device

APPLICATION IMAGE

DESCRIPTION

The piston retraction device is used for the controlled, damage-free, and skew-free retraction of pistons on disc brakes of cars, motorcycles, and trucks with fixed caliper disc brakes. The piston resetting device 126-00 is the ideal choice for brakes with a brake cylinder.

RANGE OF APPLICATION

For a quick and time-saving repair of brake calipers

BENEFIT

- Compatible for all common vehicle types without integrated parking brake locking mechanism
- The reset tool is suitable for the following vehicles, for example: Touareg, Phaeton, Porsche Cayenne, Audi A8, Q7, BMW M3, etc.
- The solid construction ensures synchronous resetting of all pistons

OPERATION

- Insert the retractor into the brake calliper
- Reset the piston by actuating the spindle

MASTER DATA

GTIN [EAN]	4021176487774
Country of origin	DE
Case material	Tool steel
Series	126-15
Net weight [kg]	1,845 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
