

220-3 2-jaw puller with conical self-centering, up to 120 mm clamping range, 120 mm clamping depth

DESCRIPTION

The 2-jaw pullers with conical self-centering are used for centric pulling of bearings, gears, and disks in all common sizes for craft, workshop, and industry. This allows loosening any component sitting on a shaft and externally accessible. By tightening the tensioning cone, the puller legs are automatically centered. By operating the tensioning cone, the desired clamping range can be adjusted. Additionally, the puller legs can be preloaded with the cone to prevent possible slippage. Usable as both external puller and internal puller (in combination with a slide hammer or counter stay) by simply reversing the puller legs and the tensioning cone.

BENEFIT

- Self-centering of the puller leg by tightening the clamping cone
- The clamping cone regulates the setting of the desired clamping depth
- Optionally convertible from an external Puller to an internal extractor by turning the puller leg and the clamping cone

MASTER DATA

GTIN [EAN]	4021176080142
Country of origin	DE
Case material	Tool steel
Series	220
Net weight [kg]	2,45 kg
Package contents	1 piece
Packaging Act	PAP 20
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS
