

230-I Slide hammer for injectors for the removal of stuck common rail injectors

DESCRIPTION

The extraction tool for injectors of the 230-I series is used to pull out diesel engine injectors in passenger cars in workshops and the automotive industry. The ergonomically shaped, massive sliding piece of the slide hammer allows the applied force to be optimally transferred and a strong shock effect to be achieved. This also ensures contactless and gentle extraction.

RANGE OF APPLICATION

For pulling injectors from diesel engines in cars in the workshop and automotive.

BENEFIT

- The shape of the sliding piece enables a high impact weight of the slide hammer with easy application.
- The internal stop point prevents pinching and ensures a safe working process

MASTER DATA

GTIN [EAN]	4021176977626
Country of origin	DE
Case material	Tool steel
Series	230-I
Net weight [kg]	2,71 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
