

322-200 Disc cutter with two blades \varnothing 40 mm - 200 mm

DESCRIPTION

The disc cutter with two blades is used for cutting discs and seal rings from rubber, leather, paper, pressboard, and plastic. The two sharp cutting blades are guided on a rail that can be aligned millimeter-precise. The disc cutter allows for precise round cut-outs in the range of 40 to 200 mm in diameter.

RANGE OF APPLICATION

For cutting discs and sealing rings made of rubber, leather, paper, pressboard and plastic

BENEFIT

- Millimetre scale on prism rail allows precise work
- The plastic handle fits particularly well and securely in the hand
- Enables the cutting of various materials as well as the manufacturing of seal rings
- Also suitable for creating seal rings with small and large cuts.

OPERATION

- Bring the cutting blade to the correct position by adjusting the desired radius
- Set the centering tip on the surface to be processed
- Cut out the selected area

MASTER DATA

GTIN [EAN]	4027474616632
Country of origin	DE
Case material	Tool steel
Series	322
Net weight [kg]	0,56 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
