

332-130 Wheel punch for letters, with 10 mm character height, 58 - 61 HRC hardness on the engraving

DESCRIPTION

The hand punch stamp for letters in the 332 series is used together with a type holder to easily mark number rows on workpieces with a strength of up to 1300 N/mm² in crafts, industry, and workshops. The set has a hardness at the engraving between 58 and 61 HRC. The hand punch stamps of the 332 series are particularly suitable for marking stainless steel due to their nickel-plated surface.

RANGE OF APPLICATION

Together with a stamp holder for easy marking of number sequences

BENEFIT

- Due to the beveled viewing edge, the set numbers are readable.
- Durable through robust and high-quality material

OPERATION

- Use spacer sleeves of the holder to accommodate hand punch stamps.
- Position the stamp and imprint it into the material using a hammer.
