

440-150 Pole screw clamp for groundings with guide ring for ground cable, max. 150 mm clamping range, 60 mm clamping depth

DESCRIPTION

The pole screw clamps of the series 440 are used for grounding during welding work. The solid and application-oriented design allows for secure clamping. The series 440 also has a guide ring for grounding cables.

RANGE OF APPLICATION

For earthing during welding work

BENEFIT

- Clamping force up to 5,000 N
- Through the identification on the brackets, dimensions are quickly in sight.
- Smooth-running trapezoidal spindles ensure even higher power transmission

OPERATION

- Place the fixed arm on the workpiece to be held and roughly fix it by moving the movable clamping arm
- Tighten the threaded spindle to firmly fix the workpiece

MASTER DATA

GTIN [EAN]	4027474607647
Country of origin	DE
Case material	Tool steel
Series	440
Net weight [kg]	0,95 kg
Package contents	10 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
