

472H0200-100 All-steel lever clamp VIRIDIS with max. 200 mm clamping range, 100 mm clamping depth

DESCRIPTION

The all-steel lever clamps VIRIDIS of series 472 are used for quick and effortless clamping of multiple workpieces with high clamping pressure in crafts, industry, and workshop. The optimized rail profile ensures uniform clamping force buildup and greater power reserves, especially when the clamping range is fully utilized. This makes the series 472 up to 5 times faster than conventional clamps.

RANGE OF APPLICATION

For fast, effortless clamping of several workpieces with high clamping pressure

BENEFIT

- Clamping force up to 6,000 N
- Due to the self-arrest, it is insensitive to vibrations of the workpiece
- Release lever with anti-slip device allows safe working
- Numerous variants of the clamping range and reach of clamps enable the holding of parts of various sizes.

OPERATION

- Place the fixed arm on the workpiece to be held and roughly fix it by shifting the movable clamping jaw
- Operate the lever and fix the workpiece firmly

MASTER DATA

GTIN [EAN]	4027474030360
Country of origin	DE
Case material	Tool steel
Series	472
Net weight [kg]	0,985 kg
Package contents	10 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)
