

# 511-800 Wood clamping clamp 800 mm

## DESCRIPTION

The wooden clamps of the 511 series are used for pressing and clamping multiple workpieces. The clamps are specifically designed for wood parts, consisting of a solid top part, bottom part, and eccentric made of beech wood, along with a steel rail. This guarantees ideal handling thanks to the stepless adjustment of clamping pressure via the eccentric lever. The non-slip cork pad prevents pressure marks or other damage.

## RANGE OF APPLICATION

For pressing and clamping multiple wooden workpieces

## BENEFIT

- Continuously adjustable pressure control via eccentric lever
- Non-slip design, also on curves and edges
- Made from high-quality beech wood and bright galvanized steel rails
- Thanks to wooden parts with a natural surface, it is particularly environmentally friendly.
- Low weight
