

516-110 Glue clamp with spring, vulcanized fibreboard coating, up to 40 mm clamping range, with 37 mm clamping depth

DESCRIPTION

The glue plier clamps of series 516 are used to hold multiple workpieces in craftsmanship, industry, and workshops. The glue plier clamps are equipped with a strong spring and a vulcanized fibre coating to ensure powerful and handy holding.

RANGE OF APPLICATION

For holding several workpieces

BENEFIT

- High quality due to stamping from steel sheet
- Coating made of vulcanised fibre protects and insulates the workpiece
- Suitable for universal use in holding workpieces

OPERATION

- Activate locking pliers to hold the workpiece

MASTER DATA

GTIN [EAN]	4027474634612
