

WT-003+S Puller assortment – External extraction – BASIC+

DESCRIPTION

The BASIC+ puller set for external extraction is a wall panel, which is equipped with suitable tools for use and storage in workshops and industry. The set includes various 2-jaw and 3-jaw cross beams and pulling jaws, which can be combined into different external pullers for various applications thanks to the KUKKO modular system. This allows any component seated on a shaft and accessible from the outside to be removed. The narrow pulling jaws ensure that even tight and hard-to-reach spaces can be accessed.

RANGE OF APPLICATION

For use and storage in workshops and industry.

BENEFIT

- Compilation based on many years of experience for application in various industries
- Central availability of the products for every employee
- By storing on the wall panel, the completeness of the assortment is visible at a glance.

MASTER DATA

GTIN [EAN]	4021176141461
