

X-LS-10 Battery charging cabinet with Code-Lock RFID

DESCRIPTION

The KUKKO compartment cabinets with power connection are perfectly suited for the personal and secure storage of battery-powered devices of all kinds. Whether in industry, trades, offices, schools, universities, or public buildings – thanks to the built-in sockets, batteries can also be charged while stored. This guarantees flexible and immediate usability.

BENEFIT

- Versatile application possibilities with charging options for battery-powered electric machines, BDE devices, notebooks, tablets, smartphones or e-bikes
- Thoughtful ventilation optimal air circulation through front and rear ventilation perforations
- High variability in design with sockets
- Convincing safety CE-compliant
- Secure lockability Devices remain locked at all times and are protected from unauthorized access
