

X-SB-65x75 Tool cabinet with perforated sheet metal

DESCRIPTION

The tool cabinet of the X-SB series made of stable full metal sheet is used for secure and clear storage of tools. The perforated grids on the back panel offer enough space for attaching tool holders. The tool cabinet features lockable doors with a cylinder lock and has a maximum load capacity of 50 kg. The high-quality steel cabinets can be flexibly integrated into various working environments, thus adapting to individual requirements.

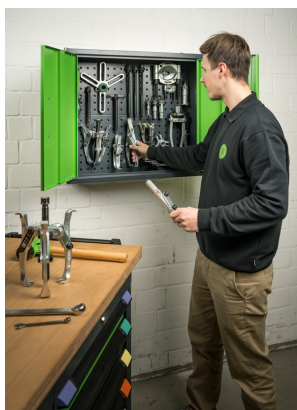

RANGE OF APPLICATION

For safe and clear storage of tools

MASTER DATA
