

Y-57-41 4-piece hydraulic nut splitter set

41 mm - 50 mm

DESCRIPTION

The 4-piece pump-hydraulic nut splitter sets are used for splitting immovable, rusted, or overtightened nuts of all grades. During this splitting process, the threaded bolt remains undamaged. The special TiN coating of the splitting chisel has particularly good friction properties, allowing for high cutting performance with minimal effort. The nut splitter set is used in the areas of Commercial Vehicles, pipe industry, tank cleaning, petrochemical industry, as well as steel and mining. The pump hydraulics guarantee an enormous cutting force of up to 90 t. The set contains: a pump-hydraulic nut splitter, a replacement splitting chisel, and two Allen keys for replacing the chisel.

RANGE OF APPLICATION

For blasting undetachably stuck, rusted or overtightened nuts of all grades

BENEFIT

- Application-focused compilation for universal use
- Through the storage in the L-Boxx, the completeness of the set can be easily overviewed.
- Sprengen der Mutter ist ohne die Beschädigung des Gewindebolzens möglich.
- Enormous explosive force thanks to pump hydraulics
- The TiN coating of the chisel guarantees higher cutting performance
- Also suitable for use in pipeline construction and other industries.

OPERATION

- Set the nut splitter on the seized nut
- Pull the spindle manually to apply pressure until the splitting chisel presses against the nut
- Connect the nut splitter to the drive with a hydraulic pump
- Operate the hydraulic pump until the nut is split
- Turn the chisel back out of the split nut

MASTER DATA

GTIN [EAN]	4021176870699
Country of origin	DE
Case material	Tool steel
Series	Y-57
Net weight [kg]	13,44 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- Y-5741M_Splitting chisel
