

Y58-556 15-piece hydraulic external puller set 50 t

APPLICATION IMAGE

DETAIL IMAGE

DESCRIPTION

The 15-piece, hydraulic external puller set Y58-556 is used for pulling particularly large and tight-fitting bearings, gears, discs, etc. in industry and commercial vehicles. The set requires no additional accessories for use. In addition to a hydraulic hollow piston cylinder with hand pump, pressure gauge, and hose, the set includes 2-jaw and 3-jaw pullers to provide a solution for various external extraction situations.

RANGE OF APPLICATION

For pulling particularly large and stuck bearings, gears, disks, etc. in industry and Commercial Vehicles.

BENEFIT

- Application-focused compilation for universal use
- By storing it in the metal case, the completeness of the set can be easily monitored.
- Force-saving and gentle pulling even for heavy-duty tasks
- The combination of hydraulics and the respective devices allows easy and controlled removal of particularly stuck parts

OPERATION

The operation of the set with its various application possibilities can be found in the enclosed manual.

MASTER DATA

GTIN [EAN]	4021176038631
Country of origin	DE
Case material	Tool steel
Series	YX8-X56
Net weight [kg]	175 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes (REACH, RoHS, POP, PROP65, TSCA)

SPARE PARTS

- Y50-206_3-jaw puller with swiveling pulling jaws (without hollow piston cylinder for pump drive)
- Y50-216_3-jaw puller with swiveling pulling jaw (without hydraulic hollow piston cylinder for pump drive)
- Y505-20_2-jaw cross beam
- Y518-10_Hand crank
- Y518-11_Center spindle
- YHP-325_Hand pump with hose and pressure gauge
- YRH-603_Hydraulic hollow piston cylinder
