

YRE-106 Hydraulic pressure cylinder with collar thread 2.1/4"-14 UNS, max. 10 t tension force

DESCRIPTION

The hydraulic pressure cylinders with collar thread of the YRE series are used with the KUKKO hydraulic program for use in all situations in crafts, industry, and workshops. The model with a large stroke length enables force-saving and versatile work even in difficult pulling situations or when a lot of force is required.

RANGE OF APPLICATION

For use with the KUKKO hydraulic program for use in all positions in craft, industry, and workshop.

BENEFIT

- All models have a CR-400 coupling sleeve with dust cap
- External thread on the cylinder head, internal piston rod thread and fixing thread on the cylinder base enable easy assembly.
- Preloaded return spring increases retraction speed and thus enhances performance
- The integrated wiper removes impurities from the piston, thereby extending the service life of the cylinder.

OPERATION

- Remove dust cap
- Connect hydraulic hose to pump and screw in the threaded sleeve by turning the union nut
- Gently move the connected parts to check the connection for safety
